CC for diagnosis of disease, staging of disease, or determining response of considerations of disease, staging of disease, of disease and consideration of mutations, converge for hybridisation probes, and for screening of genetic mutations, consideration of mutations, consideration, identification of mutation consideration of mutation considerations, and scomponents of arrays which are useful for considerations, and prophoses. The polypeptides can be used in vaccine produce antibodies. The polypeptides can also be used in vaccine control of the treatment and prevention of diseases such as upper respiratory consideration, invasive bacterial diseases such as bacteriation and consideration of the development and screening of antibacterial drugs. The provention of diseases such as bacterial drugs. The proteins on wounds, and to prevent this devices, or to extracellular proteins on fathogenesis in infections initiated other than by the consideration of pathogenesis in infections initiated other than by the consideration of pathogenesis in infections initiated other than by the consideration of the consideratio
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              The present sequence is BASB006 isolated from Neisseria meningitidis strain H44/76. BASB006 polynucleotides and polypeptides may be employed as research reagents and material for the discovery of treatments and diagnostics for diseases, particularly human diseases. They can be used for diagnosts of disease, staging of disease, or determining response of for diagnosts of disease, staging of disease, or determining response of
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Novel polynucleotides and polypeptides from Meiserria meningitis used to prepare vaccines against bacterial infections.

The present invention describes methods of obtaining immunogenic proteins of from Neisseria genomic sequences. AAA81451 to AAA8244 represent controlled by the AAA814510 and AAA814510 to AAA81303 and AAA356520 to AAA825663 represent Neisseria DNA controlled to AAA81303 and AAA356520 to AAA825663 represent Neisseria DNA controlled to AAA81321 represent PCR primers used in the isolation of AAA81304 to AAA81321 represent PCR primers used in the isolation of CR weisseria meningitidis NNA sequences; and AAA81322 to AAA81452 represent CR weisseria meningitidis NNA sequences and AAA81322 to AAA81452 represent CR weisseria meningitidis Mna sequence ORF sequences, which are all CR used in the exemplification of the present invention. The nucleic acid CR sequences, protein sequences, and antibodies against them, can be used in the manufacture of a composition can be used as a medicament (or in the manufacture of a medicament) for treating, come of the identified proteins could be components of vaccines CR against Meningococcus B; against all serotypes; and/or against all controlled to the harderium the harderium to the harderium to the harderium the harderium to the serone to the harderium to the serone to the harderium to the serone term the harderium to the serone to the harderium to the serone to the harderium to the serone term the harderium to the serone to the harderium to the serone term the harderium to the serone to the serone term the harderium to the serone to the serone term the harderium to the serone term the harderium to the serone term the harderium to the term t

                                                                                  pathogenic Neissariae. Identification of sequences from the bacterium will also facilitate production of biological probes, particularly organism-specific probes. Attempts to make efficacious Meningococcus B vaccines have failed mainly due to antigen tolerance. Multivalent vaccines have also been tried but none have successfully overcome antigenic variability. The provision of further, complete sequences may provide an opportunity to identify secreted or surface exposed proteins that may be presumed targets for the immune system and which are not antigenically variable or at least more conserved than other more
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        antigen; vaccine; diag
Meningococcus B; MenB.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Neisseria meningitidis; Neisseria gonorrheae; genome; immunogeric; antigen; vaccine; diagnosis; infection; antibacterial; identification;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Isolated nucleotide bequences of Neisseria meningitidis which can be used in the diagnosis and treatment of N. meningitidis infection and other Neisserial infections, for example, N.gonorrhoea.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Neisseria meningitidis.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Frazer CM, I
